Developer Relations Manager with experience in API tooling, technical specifications, code review, and operating Python services.

## TECHNICAL EXPERIENCE

### Developer Relations Manager (Contract)

June 2026 – Present

PREM AI

New York, NY

- Specified and operated a Python publishing service with SQLite state, Telegram approvals, and a direct X API v2 client using OAuth2 user-context authentication. Reviewed the agent-written implementation; posts used text frozen at approval.
- Triaged 33 findings from an agent-driven audit, prioritizing approval and duplicate-post risks. Reviewed and shipped fixes for compare-and-swap state transitions, crash reconciliation, and serialized token refresh with atomic persistence. CI gated changes on lint, type checks, and tests.
- Contributed two merged skills, including a Python CSV/XLSX questionnaire helper, to Prem's public Fluso repository. Added GitHub Actions, pre-commit checks, JSON Schema validation, and a Python validator for marketplace and package consistency.
- Coordinated release and content work across marketing and engineering in Linear; corrected inaccurate product claims before the external messaging was distributed.

Questionnaire helper: [PR #1](#)   Schema & validator: [commit](#)

## PROJECTS

### Personal Infrastructure & Networking

Nov 2016 – Present

PERSONAL PROJECT

Operate dozens of personal internet-facing services using VMware ESXi, KVM, and Docker, with reproducible NixOS configuration. Network work since August 2019 includes FortiGate, VLANs, DMZs, and MetalLB; troubleshoot connectivity across application, host, and network layers.

### Typst-Generated Resume System

Oct 2024 – Present

PERSONAL PROJECT

Built a Typst resume generator using shared TOML metadata, with GitHub Actions checks for required fields, configuration errors, missing outputs, and PDF page counts.

Additional code & documentation: [Personal technical blog \(Zola, Python, Mastodon API\)](#)

## SKILLS

|                               |                                                                                          |
|-------------------------------|------------------------------------------------------------------------------------------|
| <b>Programming</b>            | Python, Nix, shell scripting; TypeScript and React for Remotion                          |
| <b>APIs &amp; Integration</b> | REST APIs, X API v2, OAuth2 token lifecycle, Telegram Bot API, SQLite                    |
| <b>Tooling &amp; Docs</b>     | Git, GitHub Actions, pre-commit, pytest, JSON Schema, technical writing, Markdown, Typst |

## ADDITIONAL EXPERIENCE

### Freelance Voiceover Artist

2013 – Present

SELF-EMPLOYED / FIVERR

Remote

Run a freelance voiceover business with 1,000+ five-star reviews, managing client communication, quotes, schedules, revisions, and delivery.
